

STRATEGIC TEASER · JUNE 2026

Isaak

The right hand of every business owner.

One conversation with your entire company: ERP,
bank, taxes, documents & Tax Authority.

Ksenia Ilicheva

CEO & Founder · Verifactu Business

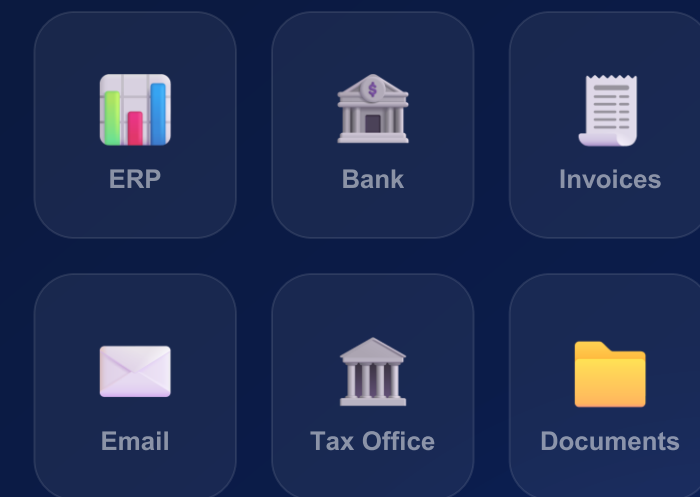

isaak.app · verifactu.business

THE PROBLEM

Business owners manage **7 apps**. None of them talk.

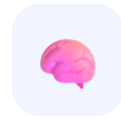

3.5 million Spanish SMEs switch between screens that never coordinate. The result: errors, duplicates, and wasted time.

Source: INE 2024

No connection between them

Three forces converging exactly in 2026.

Mature LLMs

Language models now reason with real business context, execute tools and maintain memory of long conversations.

Available today

Open Banking

Spanish banks expose PSD2 APIs for real-time account connections. Balance, transactions and positions — accessible directly without intermediate screens.

Active API

e-Invoicing mandatory

Electronic invoicing is now law in Spain. Business owners are already in digital mode — and need a single interface to manage everything.

Law 2025

THE SOLUTION

Not a copilot. The orchestrator.

We don't put AI on top of software. We make **Isaak the software** — connected to the ERP, bank, Tax Authority, email and company documents.

✕ **Copilot:** AI that assists people inside software.

★ **Isaak:** AI that orchestrates systems and reports to the business owner.

THE PRODUCT

One conversation with your entire company.

Available where business owners already are — without learning another app.

How much VAT do we have pending this quarter?

You have **€4,820** in VAT to settle before July 20th.

And you have **€23,012** in credits. Net positive balance.

Prepare VAT filing →

View invoice details

Isaak prepares. You confirm. Everything is traced.

Three steps. No training. No migrations.

1

Connect

Your ERP, bank (PSD2), email, documents and e-filing. One integration, once. Isaak keeps the context updated in real time.

~5 minutes

2

Ask

In natural language, via web, WhatsApp or Telegram. Isaak understands your company's context and responds with real numbers — not generic answers.

No tech jargon

3

Confirm

Isaak prepares the action — a tax filing, an invoice, an alert. You approve with one click. Everything is recorded with full traceability.

Full traceability

MARKET

Millions of businesses need exactly this.

Target segment: SMEs and freelancers with active management software — the digital business owner who still manages manually.
